All strings may be purchased directly from Dusty Strings or Dusty Strings harp dealers. The nylon monofilament strings are standard sizes that may be found at a number of suppliers. The wound strings are specific to Dusty Strings harps; it is unlikely that you will find substitutes that will work. If you find it more convenient to purchase gut strings from a different supplier, we have provided information above about substitute strings that will work. The C and F gut substitutes are Bow Brand Lever Gut strings. The other substitutions are Camac Classique gut strings; some are from their Light set, some from the Standard set and some from the Heavy set.

**Important: Use of strings other than those specified here will invalidate your warranty; the total amount of string tension has been carefully calculated and exceeding this amount may put your harp at risk.**
