Statement of Weight

for non-commercial movement of Dusty Strings instruments containing bubinga wood

Some Dusty Strings harps and hammered dulcimers contain bubinga wood (*Guibourtia demeusei*), which is a protected species under CITES Appendix II. According to Annotation #15 from the 17th meeting of the Conference of the Parties to CITES, instruments that are being moved across borders for non-commercial purposes and that contain 10 kg or less of bubinga wood are exempt from requiring CITES export permits.

This statement certifies that any Dusty Strings musical instrument model listed below contains 10 kg or less of bubinga wood, which we have determined by weighing the individual bubinga parts of our heaviest instrument prior to assembly.

Models covered by this statement:

FH36S	D670
FH36H	D650
FH36B	D600
FH36	D570
FH34	D550
FH32	D500
FH26	D300

Sincerely,

Susan Mooers
